Overview

This Site Wide Phasing Plan is submitted to discharge Condition 5 of the Outline planning consent for Proposed Development at North West Cambridge. This was approved against application references 11/1114/OUT and S/1886/11 for Cambridge City Council and South Cambridgeshire District Council respectively.

The Condition states as follows:

“Prior to or concurrently with the submission of the first of the reserved matters application(s), a Site Wide Phasing Plan which accords with the section 106 triggers shall be submitted to the local planning authority for approval. The Phasing Plan shall include the sequence of providing the following elements:

a) development parcels
   major distributor roads/routes within the site, including timing of provision and opening of access points into the site
b) the local centre
c) strategic foul surface water features and SUDS
d) open space and allotments
e) strategic electricity and telecommunications networks
f) environmental mitigation measures

No development shall commence apart from enabling works agreed in writing by the Local Planning Authority until such time as the phasing plan has been approved in writing by the Local Planning Authority. The development shall be carried out in accordance with the approved phasing contained within the phasing plan.”

Submission and approval of this Site Wide Phasing Plan will clarify how the site is to be phased and to assist with the determination of subsequent reserved matters applications. This will ensure that major infrastructure provision and environmental mitigation is provided in time to cater for the needs and impacts arising out of the development and provide specific response to North West Cambridge Area Action Plan Policies NW1, NW2 and NW30.

The Structure

This Site Wide Phasing Plan is structured such that each phase is explained through a drawing and accompanying explanatory narrative. The key interventions and structuring elements considered for each phase are as follows:

- Development Parcels
- Residential Units and/or Academic and Commercial Research Space
- Transport
- Infrastructure and Utilities
- Landscape and Open Space
- Community
- Education
- Environmental Measures

Where elements are not relevant they are omitted.
Phasing Principles

In accordance with requirements of the Condition this Site Wide Phasing Plan is principally informed and accords with the Section 106 triggers. These are provided at Appendix 1 and referenced as appropriate throughout the Plan.

The Proposed Development has been divided into 26 Development Parcels. These comprise land within the built area of the Application Site, including roads and Secondary and Tertiary Open Spaces, but excludes the Primary Open Space.

The Plan details 8 separate phases of development under which the 26 parcels will be delivered. These range in both scale and quantum but reflect an indicative approach that is appropriate to phased delivery.

While Phases are generally expected to be developed sequentially it is accepted that there may be exceptions as development progresses. The cumulative phasing drawings reflect a likely sequence of construction and associated build up of units. Section 106 triggers / requirements will remain consistent and must be adhered to even if unit numbers or sequencing of phases changes.

The approach adopted articulates the full range of on site planning obligations and conditions related to the development, though due to the nature of the S106 triggers some of the obligations are grouped in the phases, and as the phases include ranges of units the obligations at times vary. This is consistent with the acknowledgement that there is potential for phases to run in parallel and the possibility for reserved matters applications to include land in more than one phase.

The mixed use nature of North West Cambridge also means that phases include different uses that will be delivered at different rates and over extended time periods. Figure 1.2 shows the relative delivery expectations for the three main uses across the site.
The North West Cambridge Planning Application

  - Condition 52

Figure 1.3 Document Context
Plot-specific Issues

In addition to the specific components set out in the following sections, a range of provisions will be made on a plot-specific basis and are consistent for all development. This includes:
• Utility provision: parcels will be provided with utility connections in advance of occupations on individual parcels.
• Drainage: as parcels come forward specific on-plot requirements will be met and site drainage will link into the wider network of swales, ditches and balancing ponds.
• Waste provision: adequate provision of underground waste infrastructure will be provided within the public realm to serve residential developments. Non-residential development, including student accommodation, will be resolved on a plot-specific basis.
• On-plot landscaping will be addressed at reserved matters stage at parcel level.
• Car and cycle parking: adequate and appropriately located car and cycle parking will be provided in accordance with the Design Codes on a parcel-specific basis.
• Noise mitigation will be addressed on a parcel-specific basis, to ensure adequate standards are achieved when taking into account noise sources.
• Public Transport Strategy: where known this is indicated though the precise details of implementation will be determined in consultation with the bus operators.

Off-site Works

This strategy specifically addresses works undertaken on site to support the development over its implementation. In parallel a range of off-site measures are to be provided, particularly linked to highway works, utilities and drainage, and connections to the countryside. These works are set out in Appendices A and B and are included in specific phasing tables where relevant.

Construction Access

Construction phasing and haul roads will be identified through Construction Management Plans that will accompany each reserved matters planning application. The construction strategy is set out in further detail in the Construction Environment Management Plan.

Relationships with other Strategies

The Site Wide Phasing Plan links closely to obligations described across the following Site Wide Strategies shown in Figure 1.3. These are to be read in conjunction and as part of the suite of Strategies that satisfy details required for approval prior to or concurrent with the first reserved matters applications. In particular, the following strategies interrelate with this Phasing Strategy:
• Youth Facilities and Children’s Play
• Superfast Broadband
• Surface Water Strategy
• Flood Reduction Scheme
• Water Supply Strategy
• Foul Water Strategy
• Pollution Control
• Biodiversity Strategy
• Construction Environment Management Plan
• Framework Travel Plan (part of the S106 agreement)

Each of the phasing topics is also linked to a number of other planning conditions that should be considered as elements of the development are delivered.
Overview

Phase 1 represents the commencement of the NWC development with a focus on the Local Centre providing a mixed use socially inclusive community. This will allow for uses such as a foodstore, retail units, a school and other community facilities. Substantial quantities of key worker and market housing and supporting infrastructure will be provided to ensure a cohesive and early structure is developed for the first occupants. The focus should be on encouraging occupation and visiting of the site, establishing its existence and embedding it into the surrounding context. This will be aided through the delivery of the primary pedestrian and cycle routes that will connect Girton Village, via Huntingdon Road, through the Application Site to Storey’s Way and the city centre.

<td></td>
</tr>
<tr>
<td>Student Bedspaces</td>
<td>Student Bedsplaces (800-1000 bedspaces) 1</td>
</tr>
<tr>
<td></td>
<td>The first cluster of two student housing clusters is provided in Phase 1. The first cluster adjoins the Local Centre, benefiting from the informal open land to the south as well as close proximity to West Cambridge and the Ridgeway. Indicative student bedspace timing: 2015-2019</td>
</tr>
<tr>
<td>Faith worker Provision</td>
<td>3 Dwellings</td>
</tr>
<tr>
<td></td>
<td>Indicative timing: 2015-2017</td>
</tr>
<tr>
<td>Transport 2</td>
<td>Madingley Road West Junction and Huntingdon Road East Junction will be provided to establish the first element of the Primary Street and key vehicular access through the site.</td>
</tr>
<tr>
<td></td>
<td>Huntingdon Road East Junction will comprise the construction of a new three arm signal controlled at grade junction, including pedestrian and cycle crossings whilst junction improvement works at Madingley Road West Junction will alter it from a three arm priority junction to a four arm signal controlled at grade junction, also including pedestrian and cycle crossings.</td>
</tr>
<tr>
<td></td>
<td>The Huntingdon Road East junction is the main public transport link into the Application Site and also forms the link between the Application Site and the NIAB development to the north of Huntingdon Road.</td>
</tr>
<tr>
<td></td>
<td>Madingley Road West Junction, located adjacent to the Park and Ride and bordering the Ridge and Furrow field will be the main route into the Application Site from the south side and is nearest to the local centre.</td>
</tr>
<tr>
<td></td>
<td>Bus Gate Street represents a vehicular access route prioritised for public transport and approved access vehicles. This provides a key access route to establish the Local Centre. Delivery of this route will enable bus services to be provided at the earliest opportunity.</td>
</tr>
<tr>
<td></td>
<td>Primary pedestrian and cycle routes will be provided establishing a new route, the Ridgeway that will connect Girton Village, via Huntingdon Road, through the Application Site to Storey’s Way and the city centre. The Ridgeway will also facilitate access to the other main cycle access points to the south at Madingley Road West Junction and to the east at Madingley Road East junction delivered under Phase 6. In its earliest stage the Ridgeway route may have temporary surfacing treatment until development parcels on either side are built out.</td>
</tr>
<tr>
<td></td>
<td>A temporary construction access will exist leading from Madingley Road to the west of the Park and Ride.</td>
</tr>
</tbody>
</table>

1 Indicative approximation

2 Note that this strategy sets out major strategic transport, infrastructure and utilities works. It is assumed that for each individual parcel appropriate and required infrastructure connections will be made in advance of any occupations.
Element Details

**Links to surrounding neighbourhoods and the countryside**

This phase establishes the main link from the site to both the north (at Huntingdon Road) and south (at Madingley Road). In addition to the vehicle connections the first implementation of the Ridgeway will allow connections from Storey’s Way through to Bunker’s Hill, through both permanent features and an interim condition. As the open space immediately south of Huntingdon Road is provided the Strategic Cycle Route connecting north/south through the site.

**Infrastructure and Utilities**

**Drainage**

In accordance with the Surface Water Drainage Strategy and Washpit Brook Strategy, the two-stage channel along the alignment of the Washpit Brook will be established in Phase 1. Green corridors which also provide drainage functions will be provided as the development progresses.

**Waste**

A bring site will be provided.

**Utilities**

Huntingdon Road and Madingley Road telecommunications infrastructure will be enhanced through the installation of ducts and fibre optic and copper cables. Utility diversion and protection works will also take place in Phase 1 to allow for the diversion and/or replacement and/or protection of existing utilities affected by the proposed highway works on Huntingdon Road and Madingley Road, including drainage, electricity cables, low pressure gas mains, telecommunications apparatus, potable water mains and street lighting equipment.

A new Pumped Foul Water Rising Main will be delivered in Phase 1 on Madingley Road as well as installation of high voltage electrical connections to electricity substations within the Proposed development. A new gas supply for the Proposed Development in the form of a pressured main will also be delivered and be situated beneath Madingley Road.

The District Heating Infrastructure will also be established at this stage, including provision of the Energy Centre which will be operational from the occupation of the first key worker dwelling.

**Landscape and Open Space**

**Informal Open Land**

Informal Open Land will be provided in the Western Edge and constitute the first phase of this major aspect of Primary Open Land representing a major piece of new parkland to the west of the Proposed Development. This will include the creation of Washpit Brook establishing a two stage drainage channel. The landform of the Western edge will begin to be established using material excavated across this phase. The Western Edge will continue to be developed as the arisings from the site are used in future phases to establish landform between the M11 and the development edge. This working “front” may include interim landscapes as appropriate in order to provide for suitable recreational space until such a point that final hard and soft landscape works can be delivered.

</thead>
<tbody>
<tr>
<td>Sports Pitches</td>
<td>The Sports Pitches situated in the north of the Girton Gap and in Story’s Field are anticipated to be delivered to provide amenity access to the early residents. Associated Sports Pavilion / Changing Facilities will also be delivered in conjunction with the Sports Facilities.</td>
</tr>
<tr>
<td>Youth Facilities and Children’s Play</td>
<td>The first facilities for Youth and Children’s Play provision will be delivered to ensure development requirements of the rising population are appropriately mitigated. A range of playspace typologies, as described in the Strategy for Youth Facilities and Children’s Play should be considered and provided as appropriate.</td>
</tr>
<tr>
<td>Existing Open Land</td>
<td>The Ridge and Furrow field will be incorporated as integral part of the Phase 1 development as prescribed in Parameter Plan 3 providing for a unique open space typology and amenity options.</td>
</tr>
<tr>
<td>Community</td>
<td>An interim Community Centre will be provided to serve the early residents and is to remain open until a permanent Community Centre is delivered upon delivery of the first key worker dwelling. Phase 1 will also deliver the Health Facility and Local Retail provision. Collectively the community facilities delivered in Phase 1 represent the establishment of the local centre. As well as a focal point of local facilities serving the community, the local centre will encourage social interaction and ensure that surrounding communities are encouraged to use facilities provided. The Local Centre is located at the convergence of the main routes, the orbital public transport route and the Ridgeway forming the movement spine of the scheme. The location, as close as possible to the Park and Ride to the south will facilitate interconnection with West Cambridge and the main vehicular access route to the city centre.</td>
</tr>
<tr>
<td>Education</td>
<td>The first phase (1FE) of the primary school will be delivered in this phase. The remainder of the school will be delivered prior to the occupation of 1300 dwellings. Safe and secure pedestrian and cycle connections will be provided for school opening.</td>
</tr>
<tr>
<td>Environmental Measures</td>
<td>The first pair of kingfisher nest sites will be provided prior to occupation of the 800th residential unit; Four kingfisher nest sites will be constructed in the banks of the Washpit Brook. These will be located as two sets of two closely associated nest sites, within locally steepened sections of bank. The first two will be provided prior to occupation of the 800th residential unit. Two bat lofts are to be provided prior to occupation of the 800th residential unit. At the end of each phase at least 25% of all buildings will incorporate a bird nesting feature in accordance with details set out in the Biodiversity Strategy.</td>

Overview

Phase 2 represents the development of the first residential units to the east of the central open space and provides completion of the open space that was established in Phase 1. Located to the east of the central open space and connected through Madingley Rise and Storey's Way to the south east it will be a neighbourhood characterised by family residential units and an academic cluster.

Overview

Phase 4 provides for additional Academic and Commercial Research Space in the at the northern end of Madingley Rise. Its location on the southern edge of the Application Site extends and reinforces existing University uses at Madingley Rise. Phase 4 is relatively independent of other phases and will come forward at such a time as the University identifies the need for academic facilities in this location.
